2 YR CERTIFICATION!

AMERICAN HEART ASSOCIATION

Vision: More sarmaritan who are first responders in Bermuda is good for everyone.

CPR is an emergency lifesaving procedure performed when the heart stops beating. Performing immediate CPR and using a defibrillator can double or triple the chances of survival after cardiac arrest. A sudden cardiac arrest is when an irregular heart rhythm causes a loss of the heart's activity.

Mission: Certify 1000 people per year.

1. TO IDENTIFY the signs of cardiac arrest.
2. TO PREVENT heart and brain death with high quality CPR and the AED until help arrives.

MOST POPULAR COURSE?

HEARTSAVER AED FIRST AID

Did you know that the AED can be the most important tool to save the life of someone having a cardiac arrest?

WHO SHOULD TAKE THE COURSE?

Heartsaver courses are intended for anyone with little or no medical training. Wouldn't you want others to know what to do if you have a serious health problem? With this course, you will now align yourself and your team with best practices with emergency, health and safety regulations.

COURSE CONTAINS

- Most recent updates in cardiopulmonary resuscitation science.
- The Automatic External Defibrillator (AED)
 - First Aid Basics (duties, roles, and responsibilities of first aid rescuers, key steps of first aid)
 - Medical Emergencies (breathing, choking, allergic reaction, heart attack, stroke, and more)
 - Injury Emergencies (external and internal bleeding, wounds, sprain, broken bones, burns, and more)
 - Environmental Emergencies (bites and stings, cold- and heat-related emergencies, poisonings, and more)
 - Preventing Illness and Injury

Defibrillator
